WAN2 PHY STATIC/DHCP
WAN2 VLAN.10 PPPOE/DHCP
SAML WAN2
Assign SSO to incoming interfaces for a physical interface and phy attached VLAN for internet facing connections.
WAN1 will have a SAML setup only for WAN1 and any VLAN.10 associated with WAN1 so SAML SSO conversations between VPN client, Microsoft SAML app and the Fortinet work correctly as intended.
WAN2 needs its own SAML connection, assign this SSO to the WAN2 interfaces.
IPSEC PHASE1-INTERFACE
WAN1-VPN
IPSEC PHASE1-INTERFACE
WAN2-VPN
VPN User Group includes remote group (SAML)
All M365 groups assigned to M365 SAML Application.
All groups, no filters, apply group policy at the firewall policy layer
Firewall policy examples
01 VPN RANGE - INTF OUT - SSO.WAN1.ADMIN - DEVICES
02 VPN RANGE - INTF OUT - SSO.WAN1.STAFF - DEVICES
03 VPN RANGE - INTF OUT - SSO.WAN2.ADMIN - DEVICES
04 VPN RANGE - INTF OUT - SSO.WAN2.STAFF - DEVICES
Additional User group includes remote group SAML relevent for relevent WAN interface ie WAN1 or WAN2
Here you can filter M365 groups assigned to M365 SAML Application. (M365 Group ID added to remote group
Group IDs from M365 admin portal
Need a all allow login at the IPSEC interface, then the groups are applied at the firewall policy level
